

Lower South Platte River Watershed

Resources at work from October 1, 2007 - September 30, 2008

The Colorado Watershed Approach

Instead of the traditional statewide approach in addressing priority resource issues like soil erosion, water quality, grazing lands, wildlife, and animal waste, NRCS looks to Colorado's ten watersheds to identify their particular local resource needs and priorities.

Watershed work groups meet annually to determine which natural resource concerns are most prevalent in their communities.

In turn, Colorado NRCS focuses its resources on addressing those concerns. Colorado's local conservation districts provide leadership in this effort to foster increased decision making at the local level.

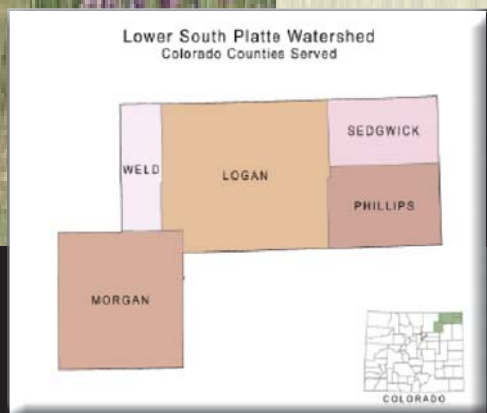

High Priority Resource Concerns in the Lower South Platte River Watershed

- Water Quantity
- Rangeland Health
- Water Quality
- Erosion
- Invasive Species
